"Enhancing lives one lesson at a time"

October 4, 2016

Dear Elba Public School Parent(s)/Guardian(s),

At the September board meeting, board members approved the purchase of six classroom surveillance cameras that will monitor activity. These cameras will record visuals and audio. The six classrooms are Science, Music, Ag, History, Math and English.

A purpose for this purchase is to help protect students, staff and the district if an incident occurs and is reported and is deemed to jeopardize the students, staff and district.

The board also approved the purchase of a new security system at the front main entrance doors. When the system is put in place, the main entrance doors will remain lock at all times and any visitors will need to be identified and buzzed in to enter the building. This is a state recommended safety precaution.

Thank you for your support,

William Porter, Superintendent
Erin Ackerson, Principal
